CANADA/ TORONTO	Store Warehouse
UAE/ DUBAI	Store Warehouse
TURKIYE/ ISTANBUL	Head Office

Tribeca was established in October 2004 as Turkey's first rotational molding company in its sector. It is still the only company in our country that uses rotational molding as the main production technique.

Tribeca, which entered the sector with a 90 m² warehouse in the early stages of its establishment, serves to day with 65 employees in a closed full fledged production area of 5500 m².

Tribeca manufactures molds too in its own 2000 m² facility in China for all its own products.

Tribeca also manufactures medical trolleys in its facility in China and sells them to close countries (Singapore, Australia, Thailand, Philippines, India, New Zealand, Mexico, Peru, Chile, Colombia, etc.). Medical trolleys are produced separately in two separate facilities. Due to its own molding plant in China, it has has the capacity to introduce new models of products in the most cost-effective and fastest way.

Tribeca's goal at the time of its establishment was to manufacture HORECA products, that used to be imported, in Turkey and export them to Europe and the Middle East while trying its best to keep a very good quality-price rate to resis competition. It has been very successful in this regard until today. It is the sole manufacturer in Turkey for at least 40% of the products in its range.

As a result of all these efforts, Tribeca has managed to reach 70 different countries in exports directly from its factory in Istanbul – Turkey. Since the raw materials we use cannot be produced in our country, they are all imported from renowned international producers. The selection of high quality raw materials is our first priority. In this regard, we don't compromise with its quality. The biggest share of our success is due to the fact that we are sensitive to this issue avoiding to think cheap.

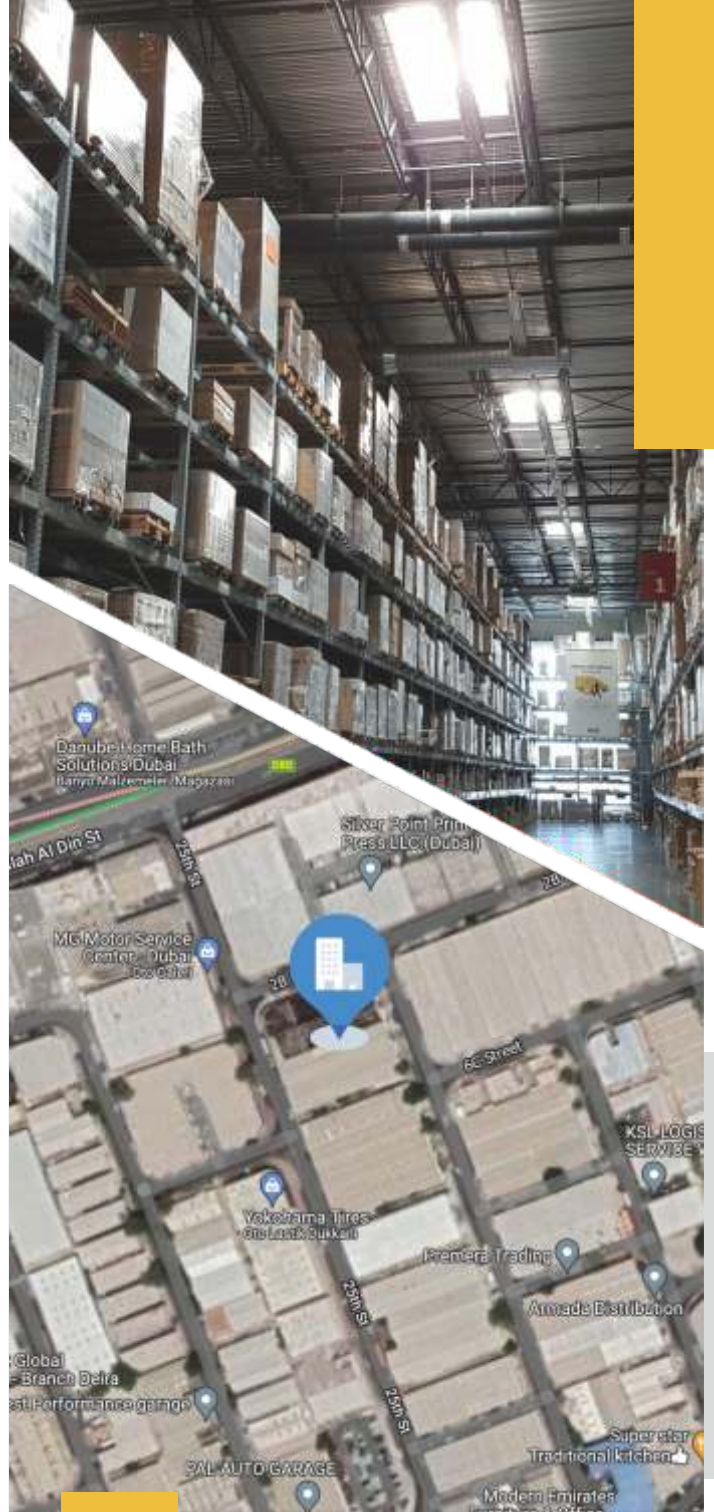

The products have been tested and certified by international certification institutions in outsourced laboratories. In addition to ISO 9001 Quality Management System - ISO 13485 Medical Devices Quality Management System, CE Certificates and NSF Certificates, Tribeca also conducts quality tests for every product separately.

In September 2021, Tribeca General Trading L.L.C. was established in UAE following the aim of TRIBECA to deliver its products faster in GCC countries from its 650 square meter warehouse located 50 meters from Salah Al Din Street wellknown as the main street of the industrial kitchen equipment suppliers in Dubai.

FULL STOCK READY TO DELIVER IN DUBAI

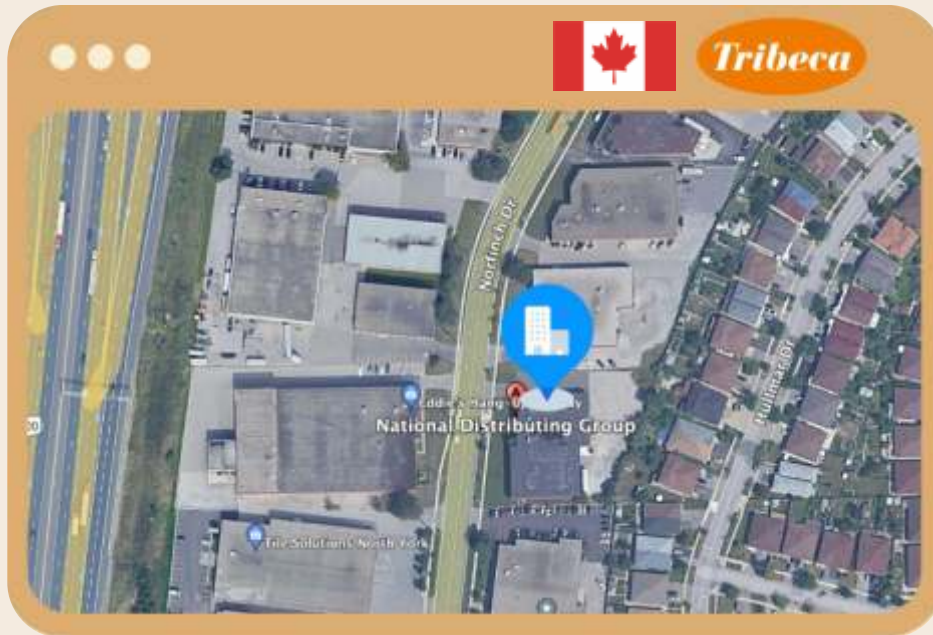

As a company exporting to 70 countries; we think that it is time to introduce Turkish production quality to the world. Since we have tried every way to increase exports, in this direction, we established a company in Hamriyah Free Zone - Sharjah in November 2019 to keep the products of other sector companies, especially our brand, ready in potential markets and deliver them instantly from the warehouse. We stocked the products of 15 different Turkish brands in total and offered them directly to the United Arab Emirates market. Until today, this type of organization has not been done in our sector. But when the pandemic started, we did not have the chance to implement what we thought as we wanted. Of course, we knew the correctness of our work from the positive reactions we received from our customers. Therefore, we decided to continue on our way even in the pandemic environment, even in the heart of the market, and moved our warehouse to Salah Al Din Street, which is considered the center of our industry in the UAE. We will continue our activities much more effectively with our newly established Tribeca General Trading L.L.C. company from 2022. I would like to underline that our 650 square meter warehouse in this region, which can be called the industrial products center of Dubai, is the first and only one in our sector not only for our country but also in the world.

"The World's Plan B is Turkey"

THE LATEST INNOVATION IN FOOD CATERING AND TRANSPORT

Features

- Excellent insulation (-40 °C +120 °C) with high thermal stability
- Made of Expanded Polypropylene EPP, a robust and heat-resistant raw material initially used in the automotive industry
- Durable and lightweight
- Perfect for hot, cold and fresh food
- Hygienic and dishwasher-proof
- 100 % recyclable
- Tightly closing lid
- In compliance with EC-regulation 1935/2004 - safe for food contact without any danger to human health

Net Weight	15 Kg
Gross Weight	16,75 Kg
Max. Capacity	86 L

Features

- Made by rotational-molding (roto-molded) technology that ensures impact resistance and long-term durability.
- Made of low density polyethylene which is suitable for food and harmless for human health.
- Food grade LLDPE material which is eco-friendly, recyclable, non-toxic, UV resistant, resistant to both heat, cold and corrosion.
- One-piece seamless construction which makes it leak-proof.
- Injected with 38 – 40 kg/m³ density CFC-free polyurethane between the internal and external walls making a double wall. Thick polyurethane insulation layer (2.3") for a longer heat-retention effect.
- Monobloc construction with no seams for increased durability.
- All screws are made by AISI 304 stainless steel.
- Door is equipped with hinges and latches made of unbreakable PA6 Nylon.
- Front loading. Heat resistance from -40 to +100 °C.
- For hot meals it loses 1.5 degree per hour and heats up 1 degree for cold meals.
- Round door gasket made by FDA approved silicone.
- Very durable construction due to the raw material and the body manufacturing technique with no need for extra protection.

Polyethylene door that swings open to 270° to the left side reducing the risk of cross contamination

The monobloc ergonomic handles are fixed in a convenient height making transportation easier even if when the thermobox is fully charged with food

Stackable design for easy transportation and carriage

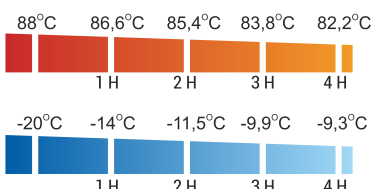

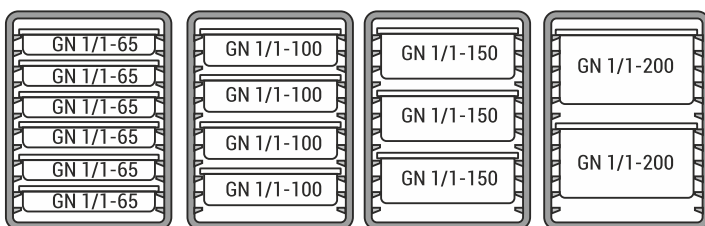

Easy locking

Designed for GN containers. It includes 12 shelving areas with a shelving range of 30 mm
